How to register your gaming console/streaming device/smart device

You need to register your device to obtain a password to connect this device to RESNET_WIFI. Make sure you have the device's MAC address before you go through this process.

Go to https://managemydevices.surrey.ac.uk

University of Surrey			
	Wi-Fi		
Jsername			
assword			

Log in using your university email address and password.

	For assistance to find the MAC address click below		
	Devices FAQ		
	The device was successfully created.		
	Create New Student Device Receipt		
	Device Name: Your Device		
	MAC Address: AA-BB-CC-DD-EE-FF		
	Current Password:		
	ujkliweb The unique WI-FI password for this device.		
	Open print window using template 👻		
	Create another device		

Make a note of this password. This is the password you will need to connect your device to RESNET_WIFI. It can only be used for this device. If you would like to use other devices, you will need to go through step one again for each new device.

Return to the device that you would like to connect to RESNET_WIFI. Follow the manufacturer's instructions for setting up wireless/wi-fi connection and connect to RESNET_WIFI using the password. If you would like detailed instructions for this step, most devices have detailed instructions on <u>MySurrey</u>.

Your device is now connected to RESNET_WIFI.

If you would like to, return to your phone/laptop, on the device registration webpage, there is an option to 'manage devices'.

Here you can see which devices you have registered, their passwords and you can add other people if you would like to share your casting capabilities with a friend/s.

The purpose of this option is to allow your friends to be able to cast content to your device/s e.g. allow a friend to cast a YouTube video directly to your Chromecast.

To add other people to your device, click on the device name and then click 'edit'. In the 'Shared with' box, enter their university username e.g. ab12345. You can add up to 20 people.
